(c) if so, the details thereof;

(d) the present status thereof; and

(e) by when the said Power Project is likely to be started?

THE MINISTER OF POWER (SHRI P.M. SAYEED): (a) to (e) In a meeting taken by the then Union Minister of Power, to review the capacity addition and Power Sector Reforms for the State of Maharashtra on 2nd July, 2003, a decision was taken to prepare a Feasibility Report within six months in respect of a power project of 1000 MW to be located at Mauda, District Nagpur in Maharashtra. Accordingly, Works for various site specific studies such as Topographical Survey, Geo-Technical Investigation, Seismic Study, Environmental Impact Assessment Study and Make-Up Water Study etc., for the project have been taken up by National Thermal Power Corporation (NTPC) to examine the Techno-Economic viability of the project. So far, approximately Rs. 21 lakhs have been spent on various site specific studies as mentioned above. However, the finalisation of the Feasibility Report is linked to tie-up of key inputs like water, coal etc.

In this regard, Government of Maharashtra was to complete/implement Gosikhurd Irrigation Project/Dam to provide water for the power project and was to indicate a firm schedule for water supply to the project. The confirmation of timeframe for assured water supply is still awaited from Government of Maharashtra. As regards coal supply, Ministry of Power/ NTPC had requested Ministry of Coal for coal tie-up from nearby coalfields of Western Coalfields Ltd. However, coal linkage for the project has been accorded from Ib Valley Coalfields, which are located approximately 600 kms. away from the project, thereby affecting, the project viability.

Action for setting up of the project, including timeframe, will depend upon the establishment of Techno-Economic viability of the project and availability of requisite inputs/clearances.

Providing power at a low price to States

†2433. SHRI BALAVANT *Alias* BAL APTE:
SHRI RUDRA NARAYAN PANY:

Will the Minister of POWER be pleased to state:

(a) whether it is a fact that Central Government provides power to the States at a low price;

†Original notice of the question was received in Hindi.

(b) if so, what are the State-wise details in this regard;

(c) whether it is also a fact that the Centre has reduced the share of power being given to various States;

(d) whether it is also a fact that in spite of request repeatedly made by these States they are not being given full quota of their share;

(e) if so, what are the reasons therefor alongwith State-wise details thereof; and

(f) what is the extent of additional financial burden on the States caused by this?

THE MINISTER OF POWER (SHRI P.M. SAYEED): (a) and (b) The Central Public Sector Undertakings (CPSUs) set up regional power plants which produce power for supply to States/UTs at tariffs determined by CERC. The average cost of energy to State Electricity Boards/State Power Utilities for 2003-04 in respect of power plants of National Thermal Power Corporation (NTPC) and National Hydro Power Corporation (NHPC) are given below:

NTPC	—	147 paise/kwh
NHPC	—	149.98 paise/kwh

Region-wise list of regional central sector power plants is given in the enclosed Statement (*See* below). The allocation from these Central Sector Power Plants to the willing States/UTs is made by the Central Government before the commissioning of these power plants irrespective of their tariff.

(c) to (f) 85% capacity from Central Power Plants is generally allocated to the constituent States before the commissioning of the power station. Shares allocated once are generally not changed unless surrendered by the State or the State is not able to pay requisite dues to the concerned Central Public Sector undertaking. The remaining 15% capacity is also allocated to the States within the region by the Central Government for meeting the emergent requirements of the States from time to time.

The availability of power from Central Generating Stations (CGSs), however, depend on the generation level of each power plant on day-to-day basis and requisition given by the States from the allocated power from CGSs.

The requests for additional allocation from 15% unallocated power of the region received from the States/UTs from time to time are considered keeping in view relative power supply position of the States, generation

resources available with the States as well as their payment capacity. As the availability of power against the unallocated quota is very limited, it is not possible to accommodate all the requests received for additional assistance from Central unallocated pool.

Statement

Region-wise regional central sector station

Advance to contractor by NEEPCO

2434. SHRI KARNENDU BHATTACHARJEE: Will the Minister of POWER be pleased to state:

(a) whether it is a fact that contractors are getting considerable interest free advance from North-East Electrical Power Corporation (NEEPCO) for executing hydel power project, causing considerable revenue loss;

(b) if so, the details of such contractors along with advance amount separately;

(c) whether it is also a fact that NEEPCO is taking money from the Government of India with interest; and
